Session Partner : United Way, an NGO
Resource Person : Ms. Manali Kamble
Number of Participants : 56

Objective : To Train students basic guidelines about UPSC Examination.

Brief Report

Objective : To Create awareness on importance of protecting Magroves.

Brief Report

The speaker explained in detail the importance of mangroves. Madam explained the students how mangroves acts as Buffer Zone between the land and sea. Mangroves protects the land from erosion which plays a significant role as nature's shield against cyclones. She also explained that ecological disasters can be prevented and protect the shorelines. Mangroves acts as Breeding and nursery grounds for a variety of marine animals and harbours a variety of life forms like invertebrates, fish, amphibians, reptiles, birds and even mammals like tigers.

Outcome of the programe :

- Students understood who practical means of protection of mangroves should be evolved.
- They also understood urgent need of framing new laws and regulations for the protection of mangroves.
- Students also came to know the need that human encroachment in mangrove forests should be discouraged.
